CONFERENCE 2019

**Cleaning and
Facility Services:
shaping the industry
for the future**

The EFCI – European Cleaning and Facility Services Industry, federation of the European national associations of the cleaning and facility services sector, is organising its 10th Conference.

The Conference will be held in the iconic centre *The Square*, in the heart of Brussels, capital of Europe. The event has been re-conceived with the renovation of the EFCI itself. It aims at being a reflection point for the industry, to give its companies the necessary tools to prepare for the challenges ahead – without forgetting to look back to the successful history of the sector.

During the Conference, speakers will analyse the evolution of the sector as well as discuss how the

industry is innovating from different perspectives: (i) innovation through the value chain, (ii) social innovation and inclusion and (iii) circular economy.

The Conference will be attended by relevant representatives from the European Institutions and EFCI's stakeholders, as well as from the sector itself. It also intends at becoming a platform for the EFCI to introduce its stakeholders to the developments and challenges of the sector in a crucial year at the European political level.

EFCI's Conference is now open for sponsorship opportunities, both to support the event and get visibility at a meeting point for the industry.
