

European Cleaning and Facility Services Industry

EFCI's 10th Conference announced: “Cleaning and Facility Services: shaping the industry of the future” – 28 June 2019, Brussels

Brussels, 08 February 2019 – The EFCI will hold its 10th conference in Brussels on 28 June 2019. The program will feature interesting panel discussions on innovation across the industry: through our value chain, social innovation and integration as well as innovation for sustainability.

The European Cleaning and Facility Services Industry (EFCI), the federation of the European national associations of the cleaning and facility services sector, is organising its tenth Conference on 28 June 2019. The Conference will be held in the iconic conference centre [The Square](#), in the heart of Brussels. It will count with the presence of relevant representatives from the European Institutions and EFCI's stakeholders, as well as from the sector itself.

The event has been re-conceived with the modernisation of the EFCI. It aims at being a reflection point for the industry, to give its companies the necessary tools to prepare for the challenges ahead, without forgetting to look back to the successful history of the sector.

During the Conference, speakers will analyse the evolution of the sector and the challenges to come, as well as discuss how the industry is innovating from different perspectives: innovation throughout the value chain, social innovation and the industry's contribution to the circular economy.

The Conference will also be a platform for the EFCI to introduce its stakeholders to the developments and challenges of the sector in a crucial year at the European political level.

EFCI's Conference is now open for sponsorship opportunities, both to support the event and get visibility at a meeting point for the industry.

More information about the event (including registration and sponsorship opportunities) are available on the dedicated page: www.efci.eu/conference2019.
